

## Environmental Policy Statement

ATG is the world's leading theatre company covering every discipline in the industry and producing multi-award winning shows. We are passionate about providing extraordinary live experiences to audiences across the globe, but we recognise that in doing so we contribute to climate change and global warming.

ATG is committed to protecting the environment and minimizing the environmental impacts of our theatres and productions. We recognize that our work has an effect on the local and global environment, and we aim to reduce negative impacts through continuous improvement of our environmental management practices.

We have implemented and maintain an Environmental Management System that adheres to the criteria of ISO14001 and applies to all our UK venues, productions, and operations. Our environmental commitments are:

- Reducing energy usage across all our venues, and improving the energy efficiency of service systems
- Embedding sustainability practices in all areas of our business in order to prevent pollution and mitigate our environmental and climate change impact
- Comply with all applicable environmental laws and regulations. We will monitor changes in environmental legislation and update our practices accordingly
- Maximise recycling and reducing waste to the lowest practicable level, sending nothing to landfill
- Consider environmental factors in procurement. We will preferentially purchase environmentally friendly products and services and engage with suppliers about their environmental performance.
- Communicate our environmental commitment and efforts to staff, suppliers, partners, and the public. We aim to lead by example and encourage environmental awareness and responsibility.

All ATG staff have a responsibility to follow company environmental procedures and identify ways to improve our environmental performance. Implementation of this policy is the responsibility of the Group Operations Team, who will provide guidance, resources, and training to support continuous improvement. ATG's board will regularly review environmental objectives and our progress.

This policy will be updated periodically to account for new operations, venues, environmental impacts, regulations, and our evolving commitment to environmental stewardship.
